

Statement of participation

Anum Siddique

has completed the free course including any mandatory tests for:

Climate change: transitions to sustainability

This 5-hour free course laid out the case for an end to the human reliance on fossil fuels and looked at some of the ways this might be possible.

Issue date: 14 October 2025

COURSE CODE: **U316_1**

Climate change: transitions to sustainability

<https://www.open.edu/openlearn/nature-environment/environmental-studies/climate-change-transitions-sustainability/content-section-0>

Course summary

Human societies have to take urgent action to end their dependences on fossil fuels. We have to alter the whole path of our development and decision making in order to make our societies both environmentally adaptable and sustainable. This free course, Climate change, takes on the task of trying to chart some of the ways in which it might be possible.

Learning outcomes

By completing this course, the learner should be able to:

- understand the four dimensions of globalisation in relation to climate change
- distinguish between the three approaches to achieve sustainability
- know the difference between 'government' and 'governance'
- identify what makes ecological citizenship distinctive
- understand how the medium of the web can aid transitions to sustainability.

Completed study

The learner has completed the following:

Section 1

Globalisation and environmental change

Section 2

Globalisation and the global environment: three views

Section 3

Governance, citizenship and sustainability

Section 4

Making it happen – sustainability in practice

Section 5

New ways of looking at the world

Section 7

Summary and final thoughts

Section 6

Conclusion
