PROJECTS

FINAL YEAR PROJECT

Android Single or Multiple Screen Sharing in Real-time

- The goal of the project is to share a screen to single to single users or single to multiple users at once.
- This app also provides a recording feature, on a shared screen between presenter and viewer.
- This app also provides a voice option when the screen is shared between the presenter and the viewer.
- The user creates a session.
- The user sends the room/session number in a message to another user for screen sharing.
- The other main objective is to transfer data with security by using the AES algorithm.

SEMESTER PROJECTS

University Management System

- The goal of the project is to develop a university management system so the University can easily manage students and courses. This system also manages faculty records.

Hotel Check-In/Check-Outs

- The goal of the project is to maintain records of customer check-in and checkout in a hotel.

Library Catalogue System

- The goal of the project is to maintain data for the library.

SKILLS

- Android (Java), C++
- MS Office (MS Word, MS Excel, MS PowerPoint), MS Visio
- Software Documentation, Software Testing.
