Bahria Town, P-8, Rawalpindi.

SUMMARY

I am an experienced educator with a successful track record in guiding students through the complexities of finance and management. Holding a Ph.D. in Finance, along with an MBA and MS in the same field, my expertise spans subjects such as Financial Management, Corporate Finance, International Financial Management, and Quantitative Methods in Finance. Additionally, I am proficient in Business Math and Statistics, Corporate Governance, Operation Management, Organizational Behavior, FinancialAccounting, Portfolio Theory, Supply Chain Management, and Total Quality Management.
Bringing over a decade of lecturer experience to the table. My teaching philosophy prioritizes the delivery of both theoretical knowledge and practical insights, ensuring students are well-prepared for professional challenges. This approach has been refined through years of dedicated service.
My commitment to academic excellence, combined with a deep understanding of diverse financial subjects, positions me as a valuable asset to any institution. I excel in creating inclusive learning environments and tailoring teaching methods to meet students' unique needs. Eager to contribute to a dynamic academic environment valuing excellence in teaching and research, I bring a passion for cultivating knowledge and a rich background in academia.

PROFESSIONAL SKILLS

- **Financial Management:** Expertise in guiding students through principles and practices of financial decision-making within an organization.
- **Corporate Finance:** In-depth knowledge of financial strategies, investment decisions, and capital structure management for corporations.
- **Financial Theory:** Proficiency in teaching the theoretical foundations that underlie financial decision-making and economic principles.
- **International Financial Management:** Experience in educating students on managing financial operations in a global context, including foreign exchange risk and international investment strategies.
- **Quantitative Methods in Finance:** Strong understanding and teaching capabilities in applying quantitative techniques and mathematical models to financial problem-solving.
- **Business Math and Statistics:** Skillful in teaching mathematical and statistical tools relevant to business decision-making.
- **Corporate Governance:** Knowledge of principles and practices related to corporate governance, including board structures, ethics, and transparency.
- **Operation Management:** Proficient in educating students on efficient and effective management of operational processes within an organization.
- **Organizational Behavior:** Expertise in teaching the dynamics of individual and group behavior within an organizational context.
- **Financial Accounting:** Competence in providing a comprehensive understanding of financial reporting and accounting principles.
- **Portfolio Theory:** Specialized knowledge in portfolio construction and management, including risk assessment and diversificationstrategies.
- **Supply Chain Management:** Experience in guiding students through the principles and practices of supply chain operations and optimization.
- **Total Quality Management:** Proficiency in teaching quality management principles to enhance organizational performance and customer satisfaction.
