EXPERIENCE

MID-LEVEL SOFTWARE DEVELOPER (LARAVEL)
[Friends It Solutions MAY-2022|CONTINUE](#)

- Developing and maintaining backend components, ensuring efficient and reusable code.
- Collaborating with front-end developers to integrate user-facing elements.
- Troubleshooting and debugging applications to ensure optimal performance and security.
- Writing and maintaining database queries using Eloquent ORM and Laravel query builder.
- Implementing APIs and third-party services integration.

INTERN LEADING to JOB PHP(LARAVEL)

[Concept Buissness Solutions Feb-2022|May-2022](#)

- Gained proficiency in front-end development languages, including HTML,CSS, and JavaScript.
- Showcased adeptness in working within a collaborative team environment.
- Worked with senior developers to develop and maintain web applications using the Laravel framework

HOD(Computer Science)

[IET Institute of Engineering and Technology OCT-2020|DEC-2021](#)

As the Head of the Computer Science Department, I led and managed academic and administrative functions, developed and enhanced curriculum, facilitated faculty and student development, and promoted innovative teaching methodologies. Additionally, I supervised research projects, collaborated with industry partners, and ensured the integration of cutting-edge technologies and practices, including Laravel development, into the academic program.

PROJECTS

INVENTORY MANGEMENT SYSTEM

As a Laravel Developer, I contributed to the development of an inventory management system, streamlining the tracking and management of stock levels, orders, sales, and deliveries. Leveraging Laravel's robust features, I implemented efficient backend operations, ensured seamless data integration

with front-end interfaces, and optimized database interactions. My role involved creating REST ful APIs, automating reporting functions, and enhancing system performance, resulting in improved inventory accuracy and operational efficiency.

LMS (Learning Management System)

I contributed to the development and maintenance of a robust Learning Management System (LMS). This involved designing and implementing scalable backend solutions, integrating user authentication, managing course content, and ensuring seamless user experience through efficient database management. My role included collaborating with cross-functional teams to deliver a high-quality, user-centric platform for education and training.
