Personal Projects

Complaint Management System (06/2021 - 08/2021)

- The **Complaint Management System** web-based project which is used for registering citizen complaints from different sectors of Islamabad Capital Territory
- We used PHP, MS SQL database server at back end to manage complaints registered by the citizens by using CRUD operations e.g. (CREATE, READ, UPDATE, DELETE etc) and HTML, CSS, JQUERY and Bootstrap as front-end.
- It enables citizens to register their complaints and then track his complaint to check his complaint status whether his complaint is resolved or pending;

News Portal (08/2023 - 09/2023)

- A **News Portal** is a web based Content Management System project created in PHP and MYSQL which allows us to view most latest news updates of the world by adding news from different categories published by authors.
- News Post were added in admin panel of a website by user and admin. Admin can add news content, categories as well as manage them too. Those content then show on front end side of a web page. Users can search and view news categories and also search relevant news.
- Front End Technologies were HTML, CSS, JavaScript and Bootstrap. It allows users and admin to upload images in admin panel to show them on front end CMS.
