RECOMMENDATIONS

Abbas Ullah Jan Professor

I am pleased to write this reference letter for Dr. Jahangir Khan, who has been an MPhil and PhD student in the Department of Agricultural & Applied Economics, the University of Agriculture, Peshawar, Pakistan, under my supervision since 2010. It has been my privilege to observe Dr. Jahangir's progress as a scholar and researcher. Throughout the program, Dr. Jahangir showed remarkable aptitude for designing consumer surveys and analyzing data. His Ph.D. dissertation, titled "Households' Preferences and Willingness to Pay for Pesticide-Free Fruits in Khyber Pakhtunkhwa, Pakistan, focused on providing valuable insights into consumers' behavior regarding food choice. Additionally, his research study supports sustainable agricultural practices and provides information for product development and marketing initiatives

Dr. Khan possesses remarkable analytical skills and a strong commitment to rigorous research. His record of publications in national and international peer-reviewed journals and his ability to secure funding from the Higher Education Commission (HEC) of Pakistan are evidence of consistency in his work. His ability to collaborate effectively, think critically, and work consistently sets him apart from his peers.

Beyond academics, Dr. Khan has demonstrated initiatives and leadership in both research and teaching. In addition to being a committed researcher, he also serves as an encouraging mentor to other MPhil and BS students.

I highly recommend Dr. Khan for any position and opportunity. I am confident that he will excel and make meaningful contributions to your esteemed department.

Please feel free to contact me if you have any further questions. Best regards

Best regards
Abbas Ullah Jan

● **Aditya R Khanal** Associate Professor

Recommendation letter for Dr. Jahangir Khan

This letter is to recommend Dr. Jahangir Khan for any academic and administrative position. With a completed doctoral degree, research experience, and enthusiasm in the agricultural and applied economics disciplines, I believe that Jahangir will be a good addition to academia.

I first met Dr. Khan in 2017 when he visited Tennessee State University (TSU) as a visiting scholar. To my understanding, he was one of the selected candidates from the Pakistan Government's competitive program as a PhD student to come to the US as an academic visiting scholar. During his stay at TSU, he regularly interacted with me for research activities. Using the data he had collected from consumer households, we developed manuscripts that are now published in peer-reviewed journals. Jahangir is the leading person to conduct the primary survey and analysis in those publications.

As reflected in his resume, Jahangir has completed his PhD and is currently working as an assistant professor at one of the Universities in his home country. Dr. Khan has research experience in consumer data analysis, willingness to pay survey design and analysis, and applied estimation methods. During my interaction with him for about six months at TSU, I found him to be a very hard-working individual with sincerity and dedication. Jahangir applies his knowledge towards the accomplishment of the task with quality work; he is enthusiastic and motivated to work in the agricultural and applied economics discipline. He communicated with me through emails even after he returned from his visiting scholar work, and he is still in contact through emails.

Based on my understanding and interactions, Jahangir shares his strong dedication to research related to consumer surveys and willingness to pay estimations. When I read through your position description, the attributes he has match your requirements. Therefore, I have recommended Jahangir for the position. Please feel free to contact me if you have any questions regarding this.

Sincerely

Dr. Aditya R Khanal

● **Muhammad Sohail** Head of Department

Reference Letter for Dr. Jahangir Khan

I am writing this letter to wholeheartedly recommend Dr. Jahangir Khan, a dedicated and talented faculty member, who has been an invaluable asset to the Department of Economics at Bacha Khan University, Charsadda, since 2021. As the head of the department, I observed Dr. Khan's contributions to the academic community through his outstanding teaching, mentorship, and research.

Dr. Khan has consistently demonstrated exceptional teaching skills and a deep commitment to his students. During his tenure, he has successfully taught undergraduate and graduate-level economics courses, imparting his knowledge with clarity and enthusiasm. His ability to engage students from diverse backgrounds and foster a stimulating learning environment is creditable.

In addition to improving students' learning, Dr. Khan can simplify complex concepts/ideas and create an engaging environment in the classroom. In addition to his teaching responsibilities, Dr. Khan has made significant contributions to the department's research activities as a mentor. He has successfully supervised five MPhil Economics students, guiding them through their research projects and ensuring the successful completion of their degrees. His mentorship and guidance have played a crucial role in developing the next generation of economists. In addition to his mentorship, Dr. Khan actively participates in various committees, further showing his commitment to the department and its mission.

Dr. Khan consistently fulfills all his departmental duties with exceptional timelines and dedication, demonstrating his commitment to the department's success. Dr. Khan's enthusiasm for his profession, strong academic credentials, and research experience make him an excellent candidate for any position he pursues. I am confident that he will continue to excel in his future endeavors and make valuable contributions to the academic community.

Please do not hesitate to contact me if you require any further information.

Sincerely,

Muhammad Sohail
