ZAIN KALEEM

Software Engineer

+92 302 3066416

zainkaleem090@gmail.com

OBJECTIVE

Diligent software engineer adept of working in agile environment with exceptional skills to lead, architect and develop the software infrastructure under pressure within time constraints. Capable of developing the SAAS based products and maintain the documentation on each phase of SDLC and successfully deliver.

SKILLS

LANGUAGES: PHP,
JavaScript,Python

FRAMEWORKS: Laravel,
Codeignitor, Bootstrap

LIBRARY: JQuery, react,Livewire

DATABASES: My SQL, PostgreSQL

TESTING: Black Box, PHP unit,
selenium

OTHERS: Rest API, Git, Docker,
AWS, JSON, Jira, UI/UX Adobe Tools

GRAPHICS TOOLS: Adobe
CS,3dmax (modeling, texturing,
lighting, rendering), Blender

PERSONAL DETAILS

NAME: Zain Kaleem

FATHER NAME: Kaleem Ullah
Qureshi

GENDER: Male

EMAIL: zainkaleem090@gmail.com

PHONE: +92 302 3066416

NATIONALITY: Pakistan

ADDRESS: Bahria Town Phase 7
Rawalpindi

EXPERIENCE - (5.5 YEARS)

PHP - LARAVEL DEVELOPER THE XSOL

1 August 2024 – Currently Working

PHP - LARAVEL DEVELOPER SHOOT AND CUT ENTERPRISES

14 may 2022 – 8 April 2024

FULLSTACK DEVELOPER – PHP DEVELOPER ESSENTIA TECHNOLOGIES

20 May 2019 – 15 Dec 2021

PHP DEVELOPER GIS PLUS TOTAL SOLUTIONS

21 Jun 2018 – 10 May 2019

WEB & GRAPHICS DESIGNER INTERN TAHADI GAMES MEDIA ABUDHABI UAE

22 July 2012 – 22 Oct 2012

PROJECTS

FLEET MANAGEMENT SYSTEM

- Real-time GPS tracking for precise vehicle locations.
- Geofencing alerts when vehicles enter or exit predefined areas.
- Real-time alerts for unauthorized vehicle use, maintenance needs, or route deviations.

MEDIA MANAGEMENT SYSTEM

- Develop the in house management system to manage the media records
- Maintaining the meta data to reduce the media redundancy
- Implement the Chat system.
- Develop and manage the posts and feeds.
- Integrate the social media APIS.
- schedule the media files for managing work load.
- Location tracking APIS for managing meta data.

LANGUAGES: Urdu, English

MISENTINEL (SCHEDULE MANAGEMENT SYSTEM)

- Maintain and develop the scheduling system with geo fencing and real-time location tracking & activity tracking.
- Manage and further develop the multi database architecture & optimize the database queries.
- Automate the sales portal & APIs.
- Develop the lone worker emergency system and APIs with real-time notifications.
- Third party APIs for payments.
- Manage the Multiple servers and setup the infrastructure of CI / CD.
- Migrate the shared hosting server to cloud AWS.
- Engage in the process of developing mask detection module using python.
- Setting up the python server using Docker, network the database and code base containers.

- Lead the development & Maintain the online recruitment system.
- Employee Management and record keeping with activity tracing.
- Architect the Dynamic forms and develop the test cases.

PROPERTY MANAGEMENT

- Automation of land record and develop the accounts system to manage the ledgers and financial statements.
- Develop the test cases and develop the finger print authorization & authentication.

COMPLAINT MANAGEMENT

- Develop and architect the chat based complaint system with notifications and APIs.

EDUCATION

BS SOFTWARE ENGINEER

Riphah International University Islamabad Pakistan
2018

ASSOCIATE DEGREE IN COMPUTER GRAPHICS & ANIMATION

Al khawarizmi International College Abu Dhabi UAE
2012

HSSC

Sheikh khalifa international school AbuDhabi UAE
2010

SSC

Sheikh khalifa international school AbuDhabi UAE
2008

INTEREST & FUTURE GOALS

Looking forward to increase my skill set in advance technologies and move towards Data Sciences and AI domain and increase my strength in architecting the cloud based products.
