SKILLS

- ❖ C++
- ❖ HTML, CSS, JavaScript, React, Next
- ❖ Flutter
- ❖ MySQL
- ❖ C# | .NET Framework
- ❖ dApps Development | Solidity | Ethers.js | Smart contract

EDUCATION

- ❖ BS Computer Science | Sir Syed CASE Institute of Technology Islamabad (Feb'21-'25)
- ❖ XII (F.Sc Pre-Engineering) | Sir Syed College Campus 2 Wah Cantt (Sep'18-'21)

ACADEMIC PROJECTS

- ❖ **The Rehan Diaries | Managing and Storing Text Files Efficiently**
Efficiently manage and store text files using The Rehan Diaries, a MERN stack application, incorporating front-end technologies like React and a MongoDB database for seamless organization and retrieval.
- ❖ **News App | API-Driven News Aggregator**
Discover daily news seamlessly with this intuitive news app, powered by React and integrated with the News API for real-time updates and effortless browsing.
- ❖ **Landmark Reality Group | Desktop Property Management System**
Landmark Reality Group introduces a sophisticated Desktop Property Management System, tailored for efficient property management tasks, powered by C# .NET for seamless functionality and reliability.
- ❖ **Rehan & Co. | Mobile Boutique for Exquisite Rings**
Rehan & Co. proudly unveils a Mobile Boutique offering exquisite rings for sale, featuring a fully-fledged e-commerce experience meticulously crafted with Flutter for seamless navigation and unparalleled user satisfaction.
- ❖ **Qreal | Blockchain Real Estate Platform**
Qreal streamlines property registration and transactions with blockchain technology. Built on the Polygon Amoy Testnet using Solidity smart contracts and React.js, it ensures secure and transparent operations. Thirdweb simplifies smart contract deployment for a seamless user experience.
- ❖ **BookLend | Efficient Library Management System**
BookLend introduces an Efficient Library Management System, meticulously designed to manage library book details with precision and ease, leveraging the power of C++ OOP for robustness and scalability.
