CAREER OBJECTIVE

A results-driven Software Engineering graduate with hands-on experience in software quality assurance, web development, and IT project management. Seeking a challenging role as a **Software Quality Assurance Engineer** in a forward-thinking organization where I can apply my expertise in manual testing, bug tracking (Jira), and API testing (Postman) to ensure the delivery of high-quality software solutions. I aim to contribute to team success while enhancing my technical skills and advancing professionally within a dynamic and growth-oriented environment.

EXPERIENCE

Virtual Assistant

MGT Enterprises LLC | March 2025 to Date

- Conduct lead generation through online research and business directories.
- Initiate contact with potential clients via phone calls and professional emails.
- Prepare and send quotations based on client requirements and pricing guidelines.
- Manage follow-ups to convert leads into active business opportunities.
- Maintain accurate records of client communications and sales activities.
