PROJECTS

ESG VS NON-ESG FIRMS: A COMPARATIVE ANALYSIS DURING AND POST COVID-19:

I applied different statistical and econometric models. ESG firms performed compared to non-ESG firms during the COVID-19 period and after it. The analysis focused on understanding whether ESG practices helped firms remain more stable and resilient during the crisis.

Ratio Analysis (2022): Implemented ratio analysis on Shell Pakistan financials and evaluated company's (2021, 2020) financial report to determine the performance of the company in **3** key metrics: Profitability, Liquidity, and Solvency. Found the company to be a going concern
