SUMMARY

Registered **Pharmacist** and **M.Phil Pharmacognosy** graduate with a deep technical background in **secondary plant metabolites**. Expert in the chemical profiling and therapeutic validation of **nutraceuticals**. I possess specialized expertise in addressing **antimicrobial resistance**, specifically through evaluating the **synergistic potential** of natural compounds against **Cefixime-resistant strains**. Experienced in managing complex laboratory protocols and interpreting phytochemical data to ensure product efficacy and safety. Seeking to leverage my research background in a high-impact product development or quality assurance role.
