---

## ***Projects***

### **MS thesis**

#### **Fabrication and Characterization of chitosan loaded nanoparticles on gram positive bacteria**

In this research i made nanoparticles and find out its characterization and also seen its effects on gram positive bacteria.

---

### **Pharm-D Research Title**

#### **Clinical Pharmacy Practice Project thesis**

In this research, I found about different drug related and patient related problems. I conclude in this research that these problems occurred due to physcian and nurses overburdened. So clinical pharmacist must be hired in hospitals to overcome these irrationality of drugs with dosing, dispensaries and polypharmacy.

---

## ***Achievements & Awards***

12.5 years experience in teaching in a Medical college.

one and half year experience in Comsats university Islamabad Abbottabad campus.

Internship for one month in the Pharmaceutical industry.

Internship for one month in hospital (Ayub Teaching hospital)

3 days Training in faculty development training in Comsats university Islamabad Abbottabad campus.

Certificate of Drug Development product management (drug discovery, drug development, drug commercialization)

Certificate of antibiotics stewardship.

Certificate of introduction to Biology of Cancer

Certificate of fundamentals of Immunology Innate and B cell Function

Certificate of precision medicine

A short course in MS computer

---

## ***Publication***

### **PERSPECTIVE OF PHARMACOLOGISTS AND PATHOLOGISTS REGARDING ARTIFICIAL INTELLIGENCE BASED ON DECISION-MAKING DRUG DISCOVERY: A CROSS SECTIONAL STUDY.**

Artificial intelligence (AI) is increasingly being used in drug discovery, but pharmacologists and pathologists are often unaware of its potential applications. AI algorithms can help tailor medicine approaches, improve treatment outcomes, and enhance patient adherence.

---

### **BLOODSTREAM INFECTIONS AND TRENDS OF ANTIMICROBIAL SENSITIVITY ATTERN: A LABORATORY BASED STUDY.**

Studies on cultural sensitivity aid in enhancing medications' empirical, logical administration in medical settings, which is essential in managing resistant infections.

The results of this investigation demonstrated the blood cultures' gram-negative bacteria's sensitivity pattern to antimicrobial drugs. E. Coli exhibits more sensitivity patterns to several antimicrobial medicines, although Klebsiella also demonstrates sensitivity. According to the study, some medications regularly used as part of our clinicians' empirical regimens could be more successful. Antibiotic usage must be prudent in light of the significant increase in antimicrobial drugs.

**COMMUNITY PHARMACISTS' EXPERTISE AND APPROACH TO THE SAFETY AND EFFICACY OF MEDICATIONS (HERBS AND ALLOPATHIC) THROUGHOUT THE PREGNANCY PERIOD**  
community pharmacists adhere to safe practices and possess expertise in utilizing drugs safely while pregnant. Consequently, the survey participants felt strongly that there was a need for seminars, sessions, and educational programs focused on herbal medicines.
