Education

MS in Computer Science — Bahria University, Islamabad (2017)

Bachelor of Education (B.Ed) — AJK University, Muzaffarabad (2015)

BS in Computer Science — Mirpur University of Science & Technology (2012)

Bachelor's Project Summary

As part of my bachelor's degree program, I developed a Learning Management System (LMS) featuring user authentication, course management, content delivery, and assessment tools. The system supported multimedia content including videos, text, and assessments. This project demonstrates my ability to analyze, design, develop, and deploy software systems while addressing user needs and current industry trends.

MS Research Work Summary

Automatic Single Document Text Summarization in Urdu. This research focused on developing and evaluating summarization and assessment tools for Urdu language text, reflecting my interest in natural language processing and machine learning applications.

Research & Publications

1. Analysis of Machine Learning Solutions to Detect Malware in Android — IEEE INTECH Conference (2017)
2. Big Data and Named Entity Recognition Approaches for Urdu Language — EAI Future5V Conference (2018)

Certifications

1. National Freelancing Training Program (NFTP) — Technical Domain (2021)
2. iSkills SEBT Batch 13 — SEO, Blogging, Freelancing & Affiliate Marketing (April 2024)
