

KASHIF ANWAR

RADIOLOGY TECHNOLOGIST | MS PROJECT MANAGEMENT CANDIDATE

OBJECTIVE

Radiology Technologist with 5+ years of clinical imaging experience across leading hospitals and diagnostic centers, now completing an MS in Project Management at COMSATS University Islamabad. My thesis examines the role of Top Management Support in Healthcare IT project success, giving me a research-based understanding of how technology, process, and people come together in healthcare organizations. I am seeking to transition from direct patient care into a project or operations management role — ideally within healthcare, health-IT, or a related service environment — where I can combine my clinical domain knowledge with formal project management training to plan, coordinate, and deliver results for cross-functional teams.

MS QUALIFICATION

MS Project Management — COMSATS University Islamabad (In Progress)

- **Thesis:** Top Management Support and Healthcare IT Project Success — the Mediating Role of Organizational Readiness for Change, grounded in Upper Echelons Theory.
- **Skills gained:** research design, questionnaire development, literature review, and applied data analysis, alongside core PM coursework in planning, scheduling, and stakeholder management.
