ABOUT ME

Dedicated and research-backed Mathematics Educator with over 5 years of teaching and lecturing experience across prominent Pakistani institutions, including Scienta Vision College and the Superior group of college. Holds a **B S in Mathematics** with an analytical background in gravitational modeling and temporal analysis . Proven expertise in classroom leadership, curriculum delivery, and student discipline management . Adept at translating abstract mathematical concepts into engaging, practical lessons for diverse student groups

EDUCATION AND TRAINING

Bs.mathematics

National university of mordern language Islamabad [03/02/2020 – 01/01/2024]

Country: Pakistan

A Bachelor of Arts (BA) in Mathematics provides a solid core of mathematical theory within a flexible curriculum that allows for broader exploration in other disciplines like languages, history, or social sciences. The program emphasizes both abstract science and the practical application of mathematical methods, reasoning, and problem-solving.

THESIS & RESEARCH

A Temporal Analysis of jet Free-Fall Motion Under Gravity

Temporal Analysis of Jet Falling Under Gravity

NUML Mathematics Department | [2024]

- Conducted mathematical and temporal modeling of objects moving under gravitational force.
- Analyzed time-dependent variables and acceleration data using analytical methods.
- Presented research findings and data visualizations to the department faculty panel.
